Serenity Customization

For Click or glue down printed cork flooring

Requirements for order:

Minimum order of 3000 s.f.

Lead time 3 months

Set-up charge \$500 for new image:

Requirements for set-up of new image:

The data file should be at least 300 dpi in the original size

Tif. data files are better than Jpeg.

For more random images, the scan should be from an area of 9' x 6' to provide a non repeat of every 16th tile. For wood planks, this repeat would be every 9th plank.

The data file can be as little as 22 square feet

An image that is non repeating has to be scanned in one image. The different planks will then be numbered. Maximum size of a single image we can print is 6' x 13'. If the floor image is to be larger, different sections would be scanned and butted/clicked up to each other.
